## **SUPPLEMENTAL ACTION**

### ***Miscellaneous***

1. Pursuant to a conversation with Joel Fogelson on 29 August 2005, it was brought to the examiner's attention that the WO 94/14282 reference was missing the examiner's initials indicating that it had been considered. This appears to have been an oversight on the part of the examiner, given that the reference had been previously considered. The examiner apologizes for any inconvenience and sets forth the following supplemental action with the examiner's initials placed next to the WO 94/142282 reference.

### ***Information Disclosure Statement***

2. The information disclosure statement filed 28 April 2005 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein pertaining to the Alan Simpson "Mastering WordPerfect 5.1 & Windows" citation has not been considered. All other references have been considered as noted.

### ***Allowable Subject Matter***

3. Claims 13-15 are allowed.
4. The following is an examiner's statement of reasons for allowance:

guide information is updated by the receipt of new channel guide information during said search step” effectively allowing the user to establish a ongoing reminder for television programs meeting the search criteria.

As to the art of record, the Hoarty reference generally discloses a method for searching for program guide information of interest wherein the user is operable to be alerted to the presence of other programming at a future date meeting the criteria. While the reference states that it is operable to notify a user as to future events meeting the search criteria, it is unclear if the future notification of other events associated with matching the search criteria necessarily occurs as channel guide information is updated. For example, as shown in Figures 25-26, the user designated recording/reminder for a program on June 24 and subsequently indicates a desire to be notified of other Bogart movies. It is unclear, however, from the disclosure that the user is actually being reminded of any future programs over and beyond those occurring on either June 25 or June 26<sup>th</sup> which were originally retrieved as matching the search criteria such that the search is on-going while program guide data is being updated so as to notify the user of additional occurrences. For example, it is unclear if a user would be notified of additional programs meeting the search criteria beyond June 26<sup>th</sup> without manually re-executing the search. The Ferguson and Yanagihara et al. references, of record, provide evidence that it is known to schedule and/or automatically execute continual searches so as to automatically alert the user as to information of interest. However, the particular usage of the automatic alerting in the Ferguson and Yanagihara et al. references is solely taught in relationship to documents (ex. publications, press releases, newspaper articles, etc.). Therefore, the references do not appear to be in the field of applicant’s

endeavor or reasonably pertinent to the problem with which the applicant was concerned; namely an apparatus for scheduling the selection of a television program for watching or recording as identified in the instant application (IA: Page 1, Lines 9-11). Furthermore, the references provide no teaching or suggestion to apply the non-analogous art to an interactive television distribution system such as that employed by Hoarty.

As to other art of record, it is noted that the Schein et al. reference appears to teach the claimed limitation, however, the earlier filing for which priority is claimed and is needed to antecedent the valid priority claim of the instant application does not provide adequate support for the usage of on-going searches. Accordingly, the Schein et al. reference does not qualify as prior art under 35 U.S.C. 102 to be used against the instant application. Similarly, the previously cited, Robarts et al. reference teaches the claimed limitation, but it also does not qualify as prior art under 35 U.S.C. 102 against the instant application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
